# BPS<sup>®</sup> C2-2

Outstanding performance  
meets compact size

GERMAN  
DESIGN  
AWARD  
WINNER  
2018

Outstanding performance with compact dimensions: the latest generation of tabletop systems from G+D enables banknotes to be processed even more efficiently and cost-effectively. A throughput rate of 1,050 banknotes per minute ensures outstanding productivity – even when reading serial numbers. Two output compartments offer an array of options for sorting, such as by denomination, orientation, or fitness. What's more, the best sensors in their class guarantee maximum reliability for authentication and fitness detection. This makes BPS C2-2 the go-to choice for top performance and a high degree of variability for commercial banks, retailers, cash-in-transit companies, and casinos.

# Efficiency in its most compact form

## Greater productivity

The high throughput of BPS C2-2 considerably increases productivity. With no loss of speed, banknotes are counted, checked for authenticity, and sorted by denomination, orientation, and quality. User-oriented and optimized operator guidance keeps the number of work steps required to a minimum.

## Greater security

BPS C2-2 boasts the ultimate top-class sensor – fast, reliable, and precise. The system's remarkable capability to detect counterfeits and sort for fitness reliably and consistently throughout the service life of the system is setting new standards.

## Greater ease of use

Intelligent software architecture ensures a simple and intuitive operation and also enables the user to make precise alterations to suit specific customer requirements, thus offering maximum flexibility. Intuitive operation has been redefined – streamlined, unique, and scaled down to what's important.

## Greater future viability

Numerous interfaces make it easy to integrate BPS C2-2 into your processing environment and to fully leverage the versatile nature of networked industry. Modern tools, apps, and web services can be seamlessly incorporated, to create customer processes that are efficient and cost-saving.

# 1,050

banknotes per minute

**BPS C2-2 combines speed with precision. It always achieves a consistent speed, during counting, sorting, and authentication – even when reading serial numbers**

## TECH FACTS

**Speed:**  
1,050 BN/min

**BN formats (length x width):**  
100–181 x 60–85 mm

**Currencies:**  
Multi-currency: up to 60 currencies  
Mixed currency: up to 10 currencies

**Singler capacity:**  
(depending on BN quality)  
up to 900 BN

**Output compartment capacity:**  
(depending on BN quality)  
up to 250 BN

**Reject compartment capacity:**  
(depending on BN quality)  
up to 100 BN

**Dimensions (H x W x D):**  
52 x 33 x 43 cm

**Weight:**  
~ 28 kg

**Temperature range:**  
15°C–35°C

**Electrical specifications:**  
100–240 VA, 50/60 Hz

**External connections:**  
1 x LAN, 4 x USB host,  
1 x USB device

**Certificates:**  
CE, GS, CB
